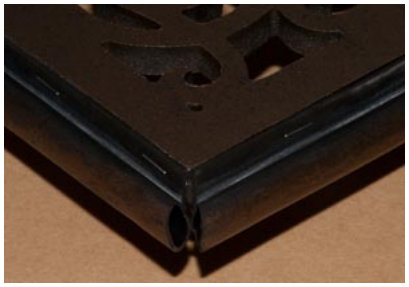
Snug Seal™ assembly method allows for expedited designing and manufacturing of Tableaux® inserts without the prior headache of making a template.

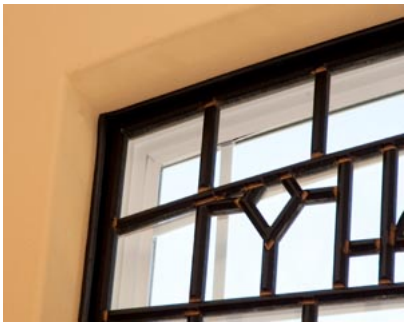
Other benefits of Snug Seal™ are cost savings from making and mailing templates, reduction of fitting errors, and simplified installation of your Tableaux®.

What is a Snug Seal™?

Snug Seal™ is a “no template” hardware option for inside mounted Tableaux® installations.



Snug Seal™ is a bulb gasket attached to a Tableaux® border.



Snug Seal™provides a uniform border around your Tableaux®

Why and when to use a Snug Seal™?

Use Snug Seal™ wherever you would use a paper template! When installed, unlike paper templates, Snug Seal™ creates a uniform border around the piece, eliminating light gaps and filling in uneven dimensions up to ½".

Snug Seal™ is only available for 3/4" material thickness Tableaux inserts.

How and what to measure for a Snug Seal™.

All measurements can be within 1/16”.
For arches with legs, we need 5 measurements

- arch height at midpoint,
- length of both legs,
- bottom width
- top of legs width.

For arches without legs, 2 measurements

- arch height
- bottom width
